

How a Leading American Legal Publisher Enhanced its Legislative Content

CLIENT OVERVIEW:

As a leading American legal publisher, the client is required to review and update its repository of legal documents. The client is bound by the state code to constantly revise core reference materials targeted at law firms specializing in jurisdictional disputes.

PROBLEM

Due to the frequent changes in legislations, the client has to review and update its repository frequently and ensure that lawyers can easily access the amended case notes.

The key result areas for the client were:

- Act Load Charting
- Note Creation and Placement
- Proof Review

SOLUTION

Lumina Datamatics deployed a team of legal content subject matter experts who processed different source inputs provided by the client. The team successfully delivered more than 3,500 legal code sections every month ensuring the accuracy of legal documents.

The legal content team has expertise in legal analysis, editorial and enhancements, writing amendment notes, case notes creation and content enhancement.

RESULT

- 35000 revised statutory code delivered annually
- 98.8% accuracy achieved in the state code process
- 99.3% accuracy for the replacement volume process
